Question 2 (1.0pt): Read the passage and do the tasks below.

Imagine a world where you can create anything you can dream of, from a custom phone case to a functioning prosthetic limb. That’s the promise of 3D printing, a revolutionary technology that builds objects layer by layer from a digital file. Unlike traditional manufacturing that carves or shapes materials, 3D printing adds material, giving designers and engineers incredible freedom to create intricate and complex designs.

This freedom extends to the materials used. From common plastics like ABS to even metals and food, 3D printing allows for customization and innovation. The possibilities are vast, transforming industries like healthcare with custom prosthetics and implants, and even aerospace with lightweight parts for airplanes.

However, 3D printing technology is still evolving. Current limitations include the size and complexity of printable objects, as well as the cost of some materials and printers. Nevertheless, 3D printing holds immense potential for the future, offering possibilities for on-demand manufacturing, personalized products, and even pushing the boundaries of medicine.

Task 1: (0,6pt) Read the passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 26 to 28.

| C. Learning to Use a 3D Printer | D. The History of Manufacturing |

27. How does 3D printing create objects?

- A. By melting and pouring liquid metal.
- B. By using molds and casting techniques.
- C. By building layers of material based on a digital file.
- D. All of the above

28. According to the passage, what is a potential future application of 3D printing?

- A. It will be used to create advanced robots.
- B. It will replace all traditional manufacturing methods.
- C. It will become too expensive for most people to use.
- D. It will allow for the creation of personalized products and on- demand manufacturing.

Task 2(0.6) Answer to each of the questions from 29 to 30.
